

Broaden Our Horizons

Climate, Cultural, Changing

What does the future look like?

Imagine temperatures so hot that you can't play outside in the heat. Imagine rainfall so heavy that it turns into terrible storms. Imagine the water in your tap drying up because the world is running out of water.

When you hear about Global Warming and Climate Change, do you ever wonder how it could affect you? In countries like Africa and Antarctica, they are currently seeing the affect of climate change. Vanessa Nakate and Greta Thunberg are two young people who are demanding that more is done to protect these places.

But what does it all mean? Global warming is the gradual rise in temperatures across the world which leads to Climate Change. Climate Change is the extreme weather which is changing over time. This means the world experiences more rainfall, more storms and more extreme weather like hotter summers and more snowfall. The ice caps are melting and sea levels are rising.

Who is responsible.. can we help at Courthouse Green?

Some website to help you:

<https://www.bbc.co.uk/bitesize/articles/z4g3f82>

https://www.wwf.org.uk/sites/default/files/2016-11/WWF_KS2_Lesson1_TeacherGuide_v4.pdf

<https://climatekids.nasa.gov/how-to-help/>

Use the websites to help you with your topic and aim to achieve **gold!**

1

GOLD

Become a weather watcher!
Create a weather watcher experiment and see your results! (Use WWF website)

2

SILVER

Create a presentation explaining what Climate Change is, who is responsible and how we can help.

3

BRONZE

Create a comic book showing the impact humans are having on the earth and how we can save it!
